Laboratorios de computación salas A y B

Alejandro Pimentel

Profesor:	
Asignatura:	Fundamentos de la Programación
Grupo:	3
No de Práctica(s): _	8
Integrante(s):	Valeria Patricia Padilla Arellano (2438)
No. de Equipo de cómputo empleado:	50
No. de Lista o Brigada:	39
Semestre:	2020-1
Fecha de entrega:	11 de Octubre del 2019

No cumpliste los objetivos de la práctica
con las funciones que utilizaste, el objetivo
era usar SWITCH y el condicional
ternario. Además no muestras evidencias (capturas)
de haber compilado y ejecutado
correctamente tus programas

CALIFICACIÓN: 5

OBJETIVO: Elaborar programas en lenguaje C que incluyan las estructuras de selección if, if-else, switch y ternaria para la resolución de problemas básicos.

Te recuerdo que lo que usamos es C.

INTRODUCCION

Los condicionales en C++, son una estructura de control esencial al momento de programar y aprender a programar Un condicional, permite establecer una serie de condiciones al interior de nuestro programa, que nos ayudan a determinar qué acciones llevará cabo dadas ciertas circunstancias, nos permite verificar si determinada condición se cumple y de acuerdo a que se cumpla o no, llevar a cabo un conjunto de acciones.

ACTIVIDAD 1

ACTIVIDAD 2

```
# Sinclude catalogs.

| Sinclude catalogs.
| Sinclude catalogs.
| Sinclude catalogs.
| Sinclude catalogs.
| Sinclude catalogs.
| Sinclude catalogs.
| Sinclude catalogs.
| Sinclude catalogs.
| Sinclude catalogs.

```

En esta actividad, se tenía que usar SWITCH

En esta actividad se debía usar el condicional ternario

ACTIVIDAD 3

```
tyt a,b;xa,yb;

tyt a,b;xa,yb;

tyt a,b;xa,yb;

tyt af ("este programa calcula al mayor valor absoluto\n");

tyt ("Mingress an mamoror");

tyt ("Mingress atro mamoror");

tyt ("Asigness atro mamoror");

tyt ("Asigness atro mamoror");

tyt ("Asigness atro mamoror");

tyt ("a.b);

tyt ("a.b);

tyt ("to minere be as mayor",a);

tyt ("tl numere be as mayor",a);

tyt ("tl numere be as mayor",b);

tyt ("tl numere be as mayor",b);

atch();

tyt ("Asigness be as mayor",b);

atch();
```

CONCLUSION

Los condicionales aumentan la "expresividad" de un software, es decir nos permiten considerar diferentes situaciones con antelación, evitando o permitiendo sortear diferentes tipos de situaciones que son del interés de nuestra aplicación.
